_____	_____	1. Elective: _____
_____	_____	2. Elective: _____
_____	_____	3. Elective or CMIS 587 — Internship _____
_____	_____	4. Final Exam—CMIS 589 (1 credit) (Satisfactory grade required.) Prerequisite: all Foundation, all Core and two Electives

MS in MIS WAIVER POLICY

Effective Fall 2009

Waivers of Foundation Courses are Subject to the Following Conditions:

- A. All waivers are contingent upon admission to the MS in MIS Program. Students who are admitted as exceptions may be required to take all of the foundation courses regardless of their academic backgrounds.
- B. In cases where titles are not descriptive of course content, students will be asked to submit a catalog description. In cases when course descriptions are not sufficient, the student may be asked to supply course syllabi to permit satisfactory evaluation.

Courses Taken Elsewhere Must be Equivalent to Appropriate SIUE Courses. Course Work Required to Waive Foundation Courses is as Follows:

Foundation Requirement

A programming course (e.g., Visual Basic, Java, C, COBOL)
A course in systems hardware and software
A course in organizational behavior
A course in financial accounting
A course in principles of marketing

SIUE Course Number

CMIS 142 or CMIS 230 or CS 140 or CMIS 260
CMIS 310
MGMT 341
ACCT 200 or 524
MKTG 300 or 525

Program Notes

The Master of Science in Management and Information Systems consists of a minimum of 31 hours taken at the graduate level and must include the content on the front side of this guide. The program may take as many as 46 hours to complete if no foundation courses are taken prior to admission to the program.

Electives may be chosen from any offerings in the CMIS department at the graduate level. One of the electives must be an internship in the computing field unless waived by the Program Director. If the internship is waived, students must substitute another elective.

Each candidate is required to pass a **final exam** conducted by an advisory committee composed of at least three members of the graduate CMIS faculty. The examination requires advanced application of skills and knowledge gained in core courses as well as the electives chosen. Students are expected to demonstrate an appropriate standard of scholarship and to provide evidence of the ability to think critically, to draw and defend conclusions and to complete the exam in a creditable manner. For more information about the final exam, please visit <http://www.siu.edu/business/msmis/>

For information regarding **transfer** of previous graduate coursework, please contact an academic advisor in the Business Student Service Office.
