=====  
Each Dean's Student Research Fellowship recipient (with input from faculty sponsors) must submit a progress report and a final written report on his/her project. A progress report will be due upon completion of the oral progress report that is usually presented in August 2018. This could be a copy of a handout or the Power Point slides. The final report will be a printed copy of the poster that is suitable for publication in a brochure and will be due on Research Day after the table clinic presentations in April 2019. The final report and the progress report should include these sections : Introduction (including background and purpose), Methods, Results, Conclusions, Future Direction.

Failure to submit a final written report will jeopardize the faculty sponsor's eligibility for future SDM research funding.
