

At Horner & Shifrin, Surveying and Geomatics are not new words; **our team has been pushing the envelope to advance geospatial solutions in the AEC industry for more than two decades.**

H&S strives to make **impactful use of surveys, 3D LiDAR scans, GIS solutions, and UAS aerial mapping on every project**, making geomatics the linchpin of success to our studies and designs.

Sound like an attractive proposition, to make substantive advancements in your field with a firm that has been recognized as a **St. Louis Post-Dispatch Top Workplace for eight consecutive years?** Others have thought so, too! It's no wonder that **one third of the H&S Geomatics team are SIUE graduates!**

Horner & Shifrin is a proud **Impact Partner** of the SIUE School of Engineering's Surveying and Geomatics degree program.
