1. What are your current 3 main areas of research?

- Cancer epidemiology and rural/urban disparities
- Oropharyngeal cancer as it relates to HPV and chlamydial infection
- Genomic variation in rural populations

2. What are the top 3 areas of expertise/tools you are looking for in a research collaborator?

- Health behavior intervention and evaluation
- Expertise in the physiology/biology of HPV and HIV infection
- Sociological/economic impacts of cancer, interventions, and screening

3. What 3 skills/tools that you have access to, are you willing to share with a potential research collaborator?

- Epidemiology, study design, statistics and evaluation
- Proposal critique and assistance from a reviewer's perspective (experience with PCORI and CDC)
- Expertise in the epidemiology of chlamydia/gonorrhea and cancer
